Data Source & Preparation

Data Source

Kaggle Dataset - Blinkit Sales Data

Data Cleaning Process

Manual cleaning performed to ensure data quality

Key Steps

- Removed duplicates
- Handled missing values
- Standardized formats
- Validated data integrity

Data cleaning was a critical step to ensure the accuracy and reliability of our analysis, providing a solid foundation for insightful conclusions regarding sales and outlet performance.

STEPS IN DASHBOARD

Here is a detailed checklist of the key steps undertaken for the Blinkit Data Analytics Dashboard

- ✓ Data Walkthrough : “Then, we thoroughly analyzed the dataset to understand its structure and key attributes.”
- ✓ Data Connection : “After that, the dataset was connected to Power BI for further analysis.”
- ✓ Data Processing : “The raw data was cleaned, transformed, and prepared for accurate analysis.”
- ✓ DAX Calculations : “We used DAX formulas to calculate KPIs and important business metrics.”
- ✓ Dashboard Lay outing : "we designed the dashboard structure and user-friendly layout.”
- ✓ Charts Development and Formatting : “Different visualizations and charts were created and formatted effectively.”
- ✓ Dashboard / Report Development : “Developed an interactive dashboard in Power BI.”
- ✓ Insights Generation : "meaningful business insights were generated from the analyzed data.”

Dashboard Overview: Visualization Components

1

Chart Types Used

- Line Charts show Total Sales trends by establishment year
- Bar Charts display Item Type and Outlet Location performance
- Donut Charts represent Fat Content and Outlet Size distribution

2

KPI Cards

- \$120.0M Total Sales
- 9K Items
- \$141.0 Average Sales
- 3.9 Average Rating

3

Interactive Features

- Filters
- Slicers
- Drill-down capabilities

4

Design Philosophy

The yellow and green color choice aligns with Blinkit's brand identity:

- Yellow represents energy and growth
- Green represents freshness and health

Dashboard 1: Sales & Outlet Performance

This dashboard provides a comprehensive overview of sales performance and outlet-specific metrics, highlighting key trends and insights.

\$1.20M

Total Sales

9K

Number of Items

\$141.0

Average Sales

3.9

Average Rating

Fat content distribution shows **Low Fat: 776.32k** and **Regular: 425.36K**. Item type performance highlights categories such as **Fruits & vegetable, Snacks, Dairy, Beverages**, and others, reflecting the mix of sales across product types.

The dashboard clearly visualizes key performance indicators at a glance, alongside detailed breakdowns of fat content distribution and item type performance, enabling data-driven decisions for sales and outlet management.

Dashboard 1: Detailed Analysis

This dashboard presents a detailed view of sales performance and outlet-specific metrics. It includes key performance indicators (KPIs) for total sales, number of items, average sales, and average rating. Visualizations further break down fat content distribution and item type performance, offering granular insights for strategic decision-making.

\$1.20M

Total Sales

9K

Number of Items

\$141.0

Average Sales

Average Rating

Fat Content Breakdown

Low Fat: 776.32k

Share: 64.6% of total sales

Regular: 425.36K

Share: 35.4% of total sales

Item Type Performance

Item Type	Sales	Insight	Rank
Fruits & Vegetables	\$178.12K	Highest-performing category	1
Snacks Foods	\$175.43K	Strong fresh-category demand	2
Household	\$136K	Stable basket contributor	3
Frozen Foods	\$119K	Reliable high-volume category	4
Dairy	\$101K	Consistent essentials category	5
Baking Goods	\$82K	Steady pantry demand	6
Canned	\$91K	Broad shelf-stable appeal	7
Health & Hygiene	\$68K	Important non-food segment	9
Meat	\$59K	Moderate contribution with variability	10
Breakfast	\$16K	Smaller but steady category	11
Seafood	\$9K	Lowest-performing category	12

The detailed breakdown shows that sales are heavily concentrated in a few high-volume categories, with Snack Foods leading overall performance. High fat products account for the majority of revenue, while essential categories such as Dairy, Frozen Foods, and Beverages continue to provide consistent support across the portfolio.

Dashboard 2: Outlet Location & Sales Trends

This dashboard shows Total Sales by Outlet Establishment Year, with the trend rising from 2011 to 2017 and peaking at 131.5 at the end of the period. Outlet Location breakdown is shown across Tier 1, Tier 2, and Tier 3, with Tier 3 leading at 472.1, followed by Tier 2 at 393.2 and Tier 1 at 336.4. Outlet Size distribution highlights Medium at 507.9, Small at 444.8, and High at 248.9. A detailed performance table compares outlet types and related metrics, giving a full view of geographical and operational trends.

Dashboard 2: Detailed Analysis

Key Performance Indicators

Total Sales by Outlet Establishment Year shows a significant upward trend from 2012 to 2022, indicating consistent growth across older and newer establishments.

\$336.40K

Tier 1 Sales

\$393.15K

Tier 2 Sales

\$472.13K

Tier 3 Sales

\$507.10K

Medium Size Outlets

\$248.99K

High Size Outlets

\$444.79K

Small Size Outlets

Detailed Outlet Performance Table

Outlet Type	Total Sales	Number of Items	Average Sales	Average Rating	Average Item Visibility
Supermarket Type 1	\$787.55K	5571	\$141.2	3.9	0.06
Supermarket Type 2	\$131.48K	928	\$141.7	3.9	0.06
Supermarket Type 3	\$130.71K	935	\$139.8	3.9	0.06
Grocery Store	\$151.94K	1083	\$140.3	3.9	0.10

This table provides a granular view of performance across different outlet types. Supermarket Type 2 leads in total sales and number of items, demonstrating superior performance metrics. Grocery Stores, while contributing significantly to sales, show slightly lower average sales and item visibility compared to supermarkets, indicating potential areas for optimization.

Conclusion & Key Takeaways

Through comprehensive Power BI analytics, we've uncovered actionable insights into Blinkit's sales performance, outlet efficiency, and customer satisfaction metrics.

\$1.20M

Total Sales
